

Press Release – 6 May 2025

IE2S achieves ISO certifications for quality and occupational health and safety

- IE2S renews ISO 9001:2015 certification for quality management and achieves ISO 45001:2018 certification for occupational health and safety for the first time
- Certifications confirm robust quality processes, a strong focus on customer satisfaction and commitment to employee safety
- Streamlined internal processes ensure customers receive high-quality, reliable and efficient services

The consulting company Intelligent Energy System Services GmbH (IE2S) has successfully renewed its ISO 9001:2015 certification for quality management and has been awarded ISO 45001:2018 certification for occupational health and safety for the first time. These certifications underline IE2S's commitment to the highest quality standards and to providing a safe working environment.

The ISO 9001 certification confirms that IE2S has implemented a robust quality management system that places continuous improvement and customer satisfaction at its core. Structured processes and clearly defined objectives enable IE2S to monitor and address internal and external stakeholder needs, comply with regulatory requirements and manage associated risks effectively. The ISO 45001 certification highlights the company's dedication to safeguarding the health and safety of its employees and to systematically reducing occupational risks.

"These certifications mark an important milestone for IE2S," says Josef Stoll, Senior Principal and Quality Management Officer at IE2S. "They not only confirm our internal processes and our commitment to quality and safety but also provide our customers and partners with the assurance that they are working with a company that meets the highest international standards."

Throughout the certification process, IE2S has further optimised its internal processes. For IE2S customers and partners, this means:

- Guaranteed quality and reliability across all services
- Greater efficiency and consistency in service delivery
- A strong focus on customer satisfaction and continuous improvement
- The reassurance of working with a company that prioritises the health and safety of its employees

About IE2S:

IE2S supports its clients as a specialist and technology consultancy, helping them navigate strategic and technical challenges of the energy and mobility transition. IE2S operates as an independent joint venture between the transmission system operator TransnetBW and the IT and management consultancy MHP. This unique collaboration brings together the expertise of two worlds: our clients benefit from broad, cross-sector know-how spanning automotive and manufacturing, digitalisation and the energy industry. Through the efficient execution of projects in physical and digital energy infrastructure—both within the power grid and at corporate sites—as well as advisory services on energy market and regulatory topics in service and product development, we create sustainable added value for our clients. We understand sustainability as the interplay of ecological benefits, long-term economic solutions and social responsibility. With the expertise and excellence of around 100 experts, IE2S has already helped drive forward the energy and mobility transition in more than 350 client projects—working towards a better future for today's and future generations.
